

Attention CHS Community:

Did you know City Honors has started recycling e-junk and copier/printer junk? It's a win-win for the environment- keep these items out of a land-fill and at the same time help raise funds for materials and programming at Pelion Community Garden at City Honors School.

These are the items we recycle:

- Cell phones, smart phones and PDA's including charging ports, cords, batteries, accessories and anything that goes into your device.
- Any electronics including cords, batteries, cases, headphones, charging ports.
- Printer cartridges including everything that goes into or is taken out of a printer, fax or copier.

See the full list of items we recycle here- <http://imaginerecycling.com/what-we-recycle/>

Collection bins have been set up outside the main office to the school, the school library and the school atrium. Donations can be made anytime school is open.

If you have a business or workplace where people would like to recycle these items, our recycling partner is glad to set up a bin to benefit City Honors and will make regular pick-ups free of any charge. Simply follow this link to set up the service and be sure to designate City Honors to receive the funding from your organization's recycling efforts: <http://imaginerecycling.com/join-the-movement/start-recycling/>
