

CELEBRATE MINDS OF ALL KINDS!

The infinity symbol is used across the world by the autistic and neurodivergent community as it represents authenticity, acceptance, & endless possibilities.

Sometimes Rainbow!

Pride for diversity with infinite variations & infinite possibilities!

Sometimes Gold!

Au is the international chemical symbol for gold & the first two letters of Autism!

The goal of Autism Acceptance Month is to be more inclusive of the very community it seeks to celebrate. It promotes education about the differences of people with autism & understanding & respecting those differences.

Thank you for your support!
