City Honors Community:

I am excited to announce Mr. Daniel Bittinger as our new International Baccalaureate Physics teacher. Mr. Bittinger will begin his work at City Honors on March 23.

Mr. Bittinger comes to us from Pine Valley High School where he has spent the past seven years teaching physics. He will be an outstanding addition to our highly qualified faculty. He has a passion for his content and understanding of best practices to maximize student learning. At Pine Valley, Mr. Bittinger was the senior class advisor, Math/Science Challenge team coach and graduation coordinator. In 2010, the senior class recognized him with the 'Most Influential Teacher Award.' He is a successful stock car driver and avid piano player. I think his energy and intrinsic love of all types of learning will endear him to our students.

Thank you to our parent and teacher representatives that volunteered their time over the February break to review candidates and select Mr. Bittinger based on his qualifications and fit for our school community. I also want to recognize former CHS parent, Peter Hurley, and current CHS parent and alumnus, Lisa Sauer, for teaching our students in the interim. Their devotion to our school and students has been critical during this transition.

Sincerely,

William A. Kresse, Ph.D.
Principal
